

Frozen Pygmy Angel Formula

General information

An exquisite Frozen Formula Food, specially formulated for dwarf Angelfish as they need a specialized diet that is entirely different to that of larger Angels.

This premium blend contains a variation of marine macro- and micro algae, including marine diatoms, which are a key component of the Pygmy Angelfish diet. We have combined these high quality marine algae with fresh seafood, oyster meat, scallop roe, sea sponge, vitamins, ... to create the perfect formula for the health and beauty of these beautiful aquarium fish.

Instructions for use: push out the required amount of cubes into a recipient. Let them defrost, without water, at room temperature during minimum 10 to 15 minutes before feeding. Your fish should be fed 2 to 5 times a day, only feed the amount that your fish will consume within 5 minutes.

Feed 2 to 5 times a day as much as your fish will eat within five minutes.
