

Betta Food

General information

Premium quality floating pellets (+/- 1,5mm), developed to produce the most nutrient complete food for the Betta species. Will enhance the natural colors of the fish. Does not cloud the water. Extensive tests have proven this food to be ideal for the care of the Betta fish. For fish of 6 months and older.

Feed up to 7 pellets twice per day, depending on the size of the Betta and the water temperature. Place the pellets gently on the water surface.

Ingrediënts

Fish meal, cereal meals, krill meal, minerals, vitamins and preservatives (calcium propionate).
