

Preserving Life and Beauty through Nutrition

Krill Pacifica

General information

Pacific Krill (Euphasia pacifica) are small shrimp-like invertebrates collected in the cold waters of the Pacific Ocean. They are a relatively large form of zooplankton. This invertebrate is the natural food of seals, penguins and baleen whales and is known to be one of the very best (nutritionally balanced) feed for fish and crustaceans. Our Krill Pacifica contains very high levels of carotenoid pigments ensuring a natural color enhancement of your fish.

Ingrediënts

Euphasia pacifica.
